Ref: Year 9 Options Results

Dear parents/carers,

Following the completion of the Year 9 student options process, we have been working on providing the fairest and most balanced choice selections for all of our students. The transition from Key Stage 3 to Key Stage 4 is well underway and information contained in this letter explains how the decisions have been made.

Triple Science: Students sat assessments towards the end of the options choice process which were marked and moderated by our science team. Students were then ranked, and the top 60 of those who had chosen triple science as an option were awarded a place. Students who did not choose triple science as an option have not been allocated to this subject.

As stated during the meetings and in the information provided prior to the option choice process, unfortunately, not all subjects will run. Subjects with low numbers of students have been withdrawn, and the students who opted for them have been allocated into other subjects they selected as a second choice. Most students have been awarded their first-choice options. Those students who have not been allocated their first choice have been placed in to their second or third choice subjects.

The information contained in this letter has also been delivered to the students in an assembly so that all involved parties have been informed. The release of the options information to students will occur on Tuesday 4 June 2024.

Yours faithfully

Mr Lee Gardner
Assistant Principal
